

BP Portable Foam Rink Divider: Divide & Conquer - Even on a Budget!

Today, many hockey leagues and associations across North America are stressing the benefits of providing an increased ratio of practice-to-game time on the ice, and the value of 'shrinking' the space players have to work with, in order to increase the number of touches each player gets during practice, thus developing player skills at an accelerated rate.

Designed specifically for use with Cross-Ice training, Border Patrol Portable Foam Rink Dividers help you make the most of ice time. The BP Rink dividers can be made as big or small as you need them to be, and because they're so super light, there is no easier product of its kind to use.

Panels come in 12, 22 and 42 inch heights, and are constructed of open-cell, high-density foam pads covered with tear-resistant and puncture-resistant vinyl. Heavy-duty Velcro straps connect the panels, allowing fast and easy set-up and take-down. BP pads can be set up on ice, or any other level indoor or outdoor playing surface.

BP foam pads can be fitted with clear vinyl 'windows' to accept advertising as well, so you can turn your rink dividers into an income stream. And, BP pads are also available with custom screened logos, giving you the option to advertise for your own facility or another way to sell ad space to sponsors. Standard color is black; some custom colors are available at extra cost.

BP 12" set of divider pads ship in 2 packages, measuring 12" x 17" x 128" at 70 lbs. per package.

It's all there: lightweight, durable, safe, and easy to set-up - BP Portable Foam Rink Dividers give you the biggest bang for the buck!
