

ON-ICE SLED BENCH SYSTEM

Built for safety and ease-of-use

On-Ice Sled Bench System

Innovative design

Developed in conjunction with the NHL, USA Hockey and sled players, Athletica is proud to introduce the world's first portable sled player bench.

An easy, interlocking setup that can be installed in minutes and doesn't require much storage space at the rink. The fact that no building renovation is needed means it will be finding its way into many rinks in the near future.

Key features:

- Fully welded aluminum frame is built in 2" width to reduce footprint
- 24" high panels
- Hinged panel connection for fast set-up and easier storage
- Safe S-bend corners
- Size flexibility
- All hardware is made from heavy-duty zinc-plated steel
- Storage cart included
